Mathematical Methods in the Applied Sciences

CONTENTS

VOLUME 11, ISSUE Nos 1–6

Issue No. 1, January–February 1989

On the Principles of Limiting Absorption and Limit Amplitude for a Class of Locally Perturbed Waveguides. Part 2: Time-dependent Theory: K. Morgenröther and P. Werner 1

Inequalities Related to Stationary Flows of Granulated Media: G. Łukaszewicz 27

Some Remarks on Newton–Sabatier Methods: R. Carroll and G. Delic 43

Almost Global Existence of Solutions of Quasi-linear Hyperbolic Equations: A. J. Milani 65

Some Remarks on Saint-Venant's Principle: H. A. Levine and R. Quintanilla . 71

A Free Boundary Problem of Biological Interest: P. Colli and A. Visintin 79

On the Continuation for Variational Inequalities Depending on an Eigenvalue Parameter: E. Miersemann and H. D. Mittelmann 95

Interpolation of Coefficients and Transformation of the Dependent Variable in Finite Element Methods for the Non-linear Heat Equation: S. Larsson, V. Thomée and N.-Y. Zhang 105

Multiple Scales Expansions for Eddy Current Computation in Layered Media: M. Chiampi, A. Negro and E. Serra 125

Issue No. 2, March–April 1989

Non-characteristic Mixed Problems for Non-linear Symmetric Hyperbolic Systems: W. M. Zajączkowski 139

Indexed or abstracted by Applied Mechanics Reviews, Cambridge Scientific Abstracts, Current Contents, Engineering Index, Engineering Societies Library, INSPEC, Mathematical Reviews, VINITI–USSR Academy of Science and Zentralblatt für Mathematik.

Existence Result and Discontinuous Finite Element Discretization for a Plane Stresses Hencky Problem: H. Ben Dhia and T. Hadhri 169

Boundary Integral Equations for Mixed Dirichlet, Neumann and Transmission Problems: T. von Petersdorff 185

General Conical Singularities in Three-dimensional Poisson Problems: A. E. Beagles and J. R. Whiteman 215

Quasilinear Hyperbolic–Hyperbolic Singular Perturbation Problem: Study of Shock Layer: M. Garbey 237

Admissibility and Uniqueness of Weak Solutions to Hyperbolic Systems of Balance Laws: W. Kosiński 253

Stability of Linear Systems of Differential Equations with Variable Structure and Impulse Effect: N. V. Milev and D. D. Bainov 271

Issue No. 3, May–June 1989

On the Instability of Resonances in Parallel-plane Waveguides: K. Morgenröther and P. Werner 279

Continuous Dependence on the Time and Spatial Geometry for the Equations of Thermoelasticity: J. C. Song 317

On Properties of the Iterative Maximum Likelihood Reconstruction Method: H. N. Mülthei and B. Schorr 331

On Stationary Flows of Asymmetric Fluids with Heat Convection: G. Łukaszewicz and W. Waluś 343

A Source Density Function: S. H. Lehnigk 353

The Electric Field in the Conductive Half Space as a Model in Mining and Petroleum Prospecting: Y. Goldman, P. Joly and M. Kern 373

Radially Symmetric Solutions of the Poisson–Boltzmann Equation: A. Krzywicki and T. Nadzieja 403

On Subsolutions of a Non-linear diffusion Problem: W. Okrasiński 409

Issue No. 4, July–August 1989

Anisotropic Hele–Shaw Flows: R. P. Gilbert and P. Shi 417

Three-dimensional Stochastic Vortex Flows: R. Esposito and M. Pulvirenti ... 431

A Penalty Approximation for a Unilateral Contact Problem in Non-linear Elasticity: J. Gwinner 447

On the Equivalence of the Schrödinger and the Quantum Liouville Equations: P. A. Markowich 459

Stationary Solutions of the Non-linear Boltzmann Equation in a Bounded Spatial Domain: C. V. M. van der Mee 471

Stationary Solutions of the Linearized Boltzmann Equation in a Half-space: F. Golse and F. Poupaud 483

Finite Element Solution for the Transcritical Shallow-water Equations: N. Goutal 503

Bifurcation from the Essential Spectrum for some Non-compact Non-linearities: C. A. Stuart 525

Canonical Difference Scheme for the Hamiltonian Equation: Q. Mengzhao ... 543

Issue No. 5, September–October 1989

Stability of a Smooth Flow in a Laval Nozzle: N. Lar'kin 559

Boundary Control of a Vibrating Plate with Internal Damping: G. Leugering and E. J. P. G. Schmidt 573

Threshold Phenomena for the First Initial Boundary Value Problem of the FitzHugh–Nagumo Equations: S. Weixi 587

Existence and Stability of Travelling Waves in Fixed-bed Reactors: U. Knöpp 599

A Global Existence Theorem for the General Coagulation–Fragmentation Equation with Unbounded Kernels: I. W. Stewart 627

On a Galerkin-averaging Method for Weakly Non-linear Wave Equations: M. S. Krol 649

Regular Solutions of Transmission and Interaction Problems for Wave Equations: F. A. Mehmeti 665

Stability and Optimal Control of Thermomechanical Processes with Non-convex Free Energies of Ginzburg–Landau Type: J. Spreckels 687

Issue No. 6, November–December 1989

Resonance Phenomena for a Class of Partial Differential Equations of Higher Order in Cylindrical Waveguides: P. Lesky, Jr. 697

Pseudo-transparent Boundary Conditions for the Diffusion Equation. Part I: P. Joly 725

Free-boundary Values in an Elastic-plastic Torsion Problem: T. W. Ting 759

Properties of Far-field Operators in Acoustic Scattering: A. Kirsch 773

Surface Gradients and Continuity Properties for Some Integral Operators in Classical Scattering Theory: A. Kirsch 789

Duality Theorems in Some Overdetermined Boundary Value Problems: L. E. Payne and P. W. Schaefer 805

Remarks on Exponential Splines, in Particular a Contour Integral Representation of Exponential B-Splines: G. Walz 821
